

19AP4-D

KINESCOPE

19AP4-D

The 19AP4-D is like the 19AP4-B except that it has a face plate made of *frosted, clear glass*. As a result, the light output is about 30% greater than shown by the curves under Type 19AP4-B.

*As soon as feasible, the 19AP4-B will supersede
the 19AP4-D.*
